

# Compare care options to help keep costs down

Getting care at the place that may best fit your condition or situation may save you up to \$2,300 compared to an emergency room (ER) visit.\* If you have a life-threatening condition, call 911 or go to the ER. For everything else, it may be best to contact your primary care provider (PCP) first. If seeing your PCP isn't possible, it's important to know your other care options, especially before heading to the ER.
